Achievements

Self-Study
2005 ~ Present.

I have more than 8 years of studying programming and development tools, almost by self-study, tutorials, online session, books, and articles, overall in programming,
I got the headlines or basics in unknown centers or unfamiliar places like AGC, but to achievement this level of experience, that's thanks to self-study.

My Owen ERP System
November2013 ~ Present.

From around one year ago, I started to build a solution as ERP system,
I am trying to focus on it contains of the most of ERP Solutions Features, and I am trying to working on debug or fix some of disadvantage features or features not bringing big benefits as expected, also I trying to avoid the most of mistakes that I noticed it found in most of solutions in the market, by using good and clean user interface and comfort user experience, to have a good position on the market,
and I'm thinking of opening source this solution on GitHub and CodePlex to Contribution of it development many of experiences.
